

Magic And Comedy
of
Dave Johnson

“Left the entire room spellbound...”
-Department of Defense

Convention Magician, Dave Johnson, specializes in corporate *comedy* magic. For over 30 years, he has been entertaining audiences with, what has become, award winning sleight of hand. The magic doesn't only happen in his hands though, the audience experiences the magic in their own hands as well. Some of the effects that Dave is known for are:

- Coins materialize multiple times in what is known (by Dave) as the “World’s Most Annoying Coin Trick”
- Spectators read Dave’s mind and in that moment, they become the opening act for the magical experience
- Dave proves to a couple that doesn’t know each other that soul mates do exist and then leaves them so they can make awkward conversation
- A demonstration of cheating at blackjack that guarantees your guests trying to leave early so they can take Dave to the casino with them (he always says no.)

On a more serious note (he suggests trying E-minor), companies and organizations love it when *Dave makes their name appear of the side of a deck of cards* as he shuffles them into order in three shuffles. With each shuffle the font gets bigger making their name more prominent.

**A Partial List Of
